

TROLLING Thunder Ultimizer™

CHARGERS

FINALLY, IT'S HERE!

The range of 12V Ultimizer™ chargers has been custom designed to maximize the performance you can get from your TROLLING THUNDER™ battery. These sophisticated chargers are powerful enough to quickly charge the battery and safe enough to leave them connected to the batteries indefinitely without damaging them.

WHY BUY ULTIMIZER™ CHARGERS?

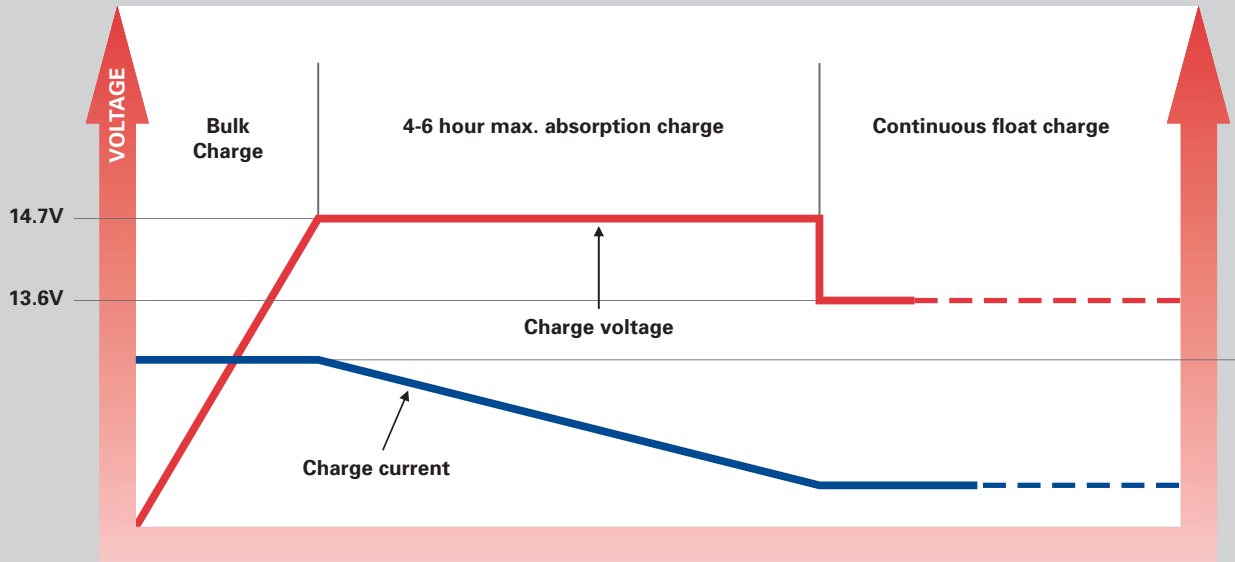

- Designed specifically for TROLLING THUNDER™ batteries only
- UL 815G listed for 6 Amp and 12 Amp
- Designed to UL 1236 marine standard for the 25 Amp, 40 Amp and 50 Amp
- Three-step charge profile ensures fast, complete and safe charge
- Continuous trickle charge keeps battery fully charged during extended periods of non-use
- Sophisticated sequential charging technology keeps multi-bank chargers lightweight and compact
- Full range covers all TROLLING THUNDER™ batteries.

CHARGER	DESCRIPTION	DIMENSIONS, ins			WEIGHT, lbs	TROLLING THUNDER™ TT MODEL
		LENGTH	WIDTH	HEIGHT		
TMAX-6A-1B	6A, single bank	7.25	7.00	2.75	2.6	300
TMAX-12A-1B	12A, single bank	9.75	7.5	3.25	5.0	300/500
TMAX-25AS-2BM	25A, dual bank sequencer, water resistant	9.75	7.5	3.25	10.0	300/500/725/1050/1175

TMAX-50AS-3BM	50A, triple bank sequencer, water resistant	11.0	9.0	5.0	14.0	300/500/725/1050/1175/1370/1550

SPECIFICATIONS:

■ **Input:** 120V, 60 Hz, single phase; current varies with model

■ **Output:** Three-step charge profile (see figure below)

- **Bulk phase:** Fast charges the battery up to 14.7V and gets the battery to about 80% state of charge

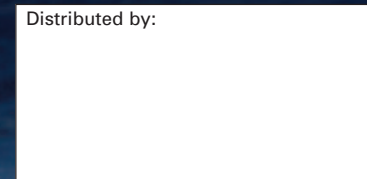

- **Absorption phase:** Finishes off the charge in no more than an additional 4 to 6 hours after completion of bulk charge

- **Float charge:** Continuous trickle charge will keep the battery topped off and ready to go
